

Annex No. 1: Product Specification

Subject: Protective mobile fences – deflectors of exhaust gas from airplanes

TOTAL QTTY: 50 pcs as follows:

Standard unit: 48 pcs

Corner unit „A“ - 1 pc

Corner unit „B“ – 1 pc

Description of product:

Mobile protective fences of exhaust gas from airplanes (jet blast deflectors). These fences protect people, environment and all other subjects as buildings, cars etc. at the airport or around from exhausted gas from airplanes by safe deflection of that and deceleration of jet blast coming from airplanes jet engines.

Deflectors must be safe and resist to explosion speed at minimal level 40m/s (144 km/h) and wind press of 60 kg/sqm.

Specification:

Concrete base/socket(s) with durable and stable construction, good storable units, easy manipulation, lifetime min. 25 years.

Fences are to be produced from construction stainless and heat-resistant steels, galvanized and painted (all blades).

Height: 2500 mm including concrete base

Width: 2000 – 2500 mm

Maximum weight: 3000 kg
